

PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER FAILURE TO MONITOR

**ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE
ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

Monitoring Requirements Not Met for Failure to monitor chlorine residual

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January of 2026 the Township's contract laboratory did not collect the required number of samples and for that the PADEP has determined we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Free chlorine	Weekly	3	January	February 2026

What happened? What was done? When will it be resolved?

Pace Laboratories, the township's contract laboratory failed to conduct the required monitoring for free chlorine during the week of January 4 - 10, 2026. According to Pace, the laboratory employee forgot to collect the required sample. Pace also neglected to inform the township that the sampling had not been completed as required until after the end of the compliance period and therefore an additional sample was not collected prior to the end of January. Although this issue was completely caused by the laboratory, PADEP regulations dictate that the township and not Pace is liable for the violation. Subsequent sampling indicated that the system chlorine residual was compliant with DEP requirements.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information regarding this notice, please contact Brenda Heck at 724-794-1773.
